US & XRAY BILATERAL KNEE 04/10/2024 Reference: 4205095

ULTRASOUND BILATERAL KNEES

History: Pain ?OA ?bursitis/tendinopathy ?Baker's cyst ?ligamentary strain.

Ultrasound Bilateral Knees

Findings:

Ultrasound Right Knee

Anterior knee:

Suprapatellar joint recess: Effusion - Moderate effusion measuring 47 x 10 x 29mm (7cc).

Quadriceps tendon: Normal appearance.

Patellar tendon: Normal appearance.

Pre-patellar bursa: Normal appearance.

Superficial infra-patellar bursa: Normal appearance.

Deep Infra-patellar bursa: Normal appearance.

Medial knee:

Pes-anserinus tendon: Normal appearance.

Pes-anserinus bursa: Normal appearance.

Medial collateral ligament: Normal appearance.

Medial knee joint margin: Normal appearance.

Semimembranosus tendon: Normal appearance.

Lateral knee:

Ilio-tibial band: Normal appearance.
Lateral collateral ligament: Normal appearance.
Lateral knee joint margin: Normal appearance.
Biceps femoris tendon: Normal appearance.

Posterior knee:

Posterior joint recess: Normal appearance.
Baker's Cyst: Non-tender, unruptured measuring 10 x 5 x 12mm (volume of 0.3cc) noted.
Popliteal artery: Normal appearance.
Popliteal Vein: Normal appearance.

Others:

Ganglion Cyst: No.

Ultrasound Left Knee

Anterior knee:

Suprapatellar joint recess: Normal appearance.
Quadriceps tendon: Mild tendinopathy, mild tenderness and mild calcification noted. No tear seen.
Patellar tendon: Normal appearance.
Pre-patellar bursa: Normal appearance.
Superficial infra-patellar bursa: Normal appearance.
Deep Infra-patellar bursa: Normal appearance.

Medial knee:

Pes-anserinus tendon: Normal appearance.
Pes-anserinus bursa: Normal appearance.
Medial collateral ligament: Normal appearance.
Medial knee joint margin: Normal appearance.
Semimembranosus tendon: Normal appearance.

Lateral knee:

Ilio-tibial band: Normal appearance.
Lateral collateral ligament: Normal appearance.
Lateral knee joint margin: Normal appearance.
Biceps femoris tendon: Normal appearance.

Posterior knee:

Posterior joint recess: Normal appearance.
Baker's Cyst: Absent
Popliteal artery: Normal appearance.
Popliteal Vein: Normal appearance.

Others:

Ganglion Cyst: No

X-Ray Both Knees

Bony alignment is maintained. No fracture or dislocation.
Knee joint spaces are within normal limits and the articular surfaces are regular.
No periarticular calcifications or loose body.
No obvious effusion is identified.

Impression:

No significant bony or articular abnormality on the plain x-ray.

Right Side:

A small effusion is seen in the suprapatellar recess.
Small popliteal cyst of 0.3cc (non-drainable) is also noted.

Left Side:

Quadriceps shows mild tendinopathic changes.
No other focal soft tissue abnormality is seen.

Thank you for referring this patient.

Typist: nk/dev

Radiologist: Dr U. Shetty
