Referrer	Dr Su Thet Paing	Lab ID	420879961	DOB	20/04/1993 (31 Yrs FEMALE)
Address	BATAVIA HEALTH 361 MARINE TERRACE GERALDTON WA 6530	Your ref.	00317051	Address	150 BAILEYS LANE VALENTINE PLAINS QLD 4715
Phone	0899658100	Phone	0400211798		

Copy to	Requested	21/11/2024			
Clinical Notes	blood in stool once diarrhoea for 3 - 4 weeks	Collected	25/11/2024 00:00	Received	26/11/2024 12:06

Faecal Calprotectin

Faecal Calprotectin 16 mg/kg <50

Performed on Diasorin Liaison from 20/02/2024.

Comments

Elevated faecal calprotectin indicates a high probability of intestinal inflammation. Many conditions including bowel cancer, NSAID ulceration, coeliac disease, diverticulitis and chronic inflammation may cause elevated levels.
For patients with known inflammatory bowel disease in remission, faecal Calprotectin > 50 mg/kg is associated with an increased risk of relapse over the next 12 months.
In patients with faecal calprotectin levels < 50 mg/kg with strong clinical indications of intestinal inflammation, a repeat sample may be useful.

Levels of > 250 mg/kg have greater positive predictive value especially in children.
In small bowel Crohn's the faecal calprotectin may be within the normal range.
This test has not been validated in children under two years of age.
Testing performed by CLIA.
If all of the five Medicare rebate criteria have been met, no out of pocket fee will be charged. All patients over the age of 50 will be charged the non-rebateable fee.
