MRI - Cardiac

Dear Dr Lo,

Thank you for referring Mr Rado FALETIC.

HISTORY:

Post Covid/vaccine symptoms.

TECHNIQUE:

1. Multiplanar CINE SSFP of the heart.
2. Multiplanar T1 and T2 fat sat black blood imaging.
3. Multiplanar delayed inversion recovery imaging post Gadolinium.

FINDINGS:

Male	Absolute	BSA indexed	Normal range
LVEDV:	208 ml	95 ml/m ²	69-121, mean 95
LVESV:	93 ml	42 ml/m ²	26-56, mean 41
SV:	115 ml	53 ml/m ²	37-71, mean 54
EF:	55%		47-67, mean 57

Male	Absolute	BSA indexed	Normal range
RVEDV:	239 ml	109 ml/m ²	67-133, mean 100
RVESV:	125 ml	57 ml/m ²	25-71, mean 48
SV:	114 ml	52 ml/m ²	35-71, mean 53
EF:	48%		44-62, mean 53

Biventricular volumes and function normal.

No regional wall motion abnormality.

No thinning or thickening of the LV myocardium.

Trabecular and papillary muscle structures normal.
No pericardial effusion.

No abnormal enhancement within the LV myocardium on delayed inversion recovery imaging post Gadolinium.

COMMENT:

Normal biventricular volumes and function with no evidence of myocarditis, infiltrate or scar.

With kind regards,

Dr Mark Hansen
Radiologist
