CT L SPINE 08/07/2024 Reference: 2960822

CT LUMBAR SPINE

Clinical History: Back pain, spinal canal stenosis. Symptoms?

Technique: Noncontrast scans were obtained.

Findings:

The lumbar spine demonstrates normal alignment. L1/2 and L2/3 demonstrate no central canal or foraminal narrowing.

L3/4 demonstrates mild central canal narrowing due to ligamentum flavum thickening. The exit foramina are clear.

L4/5 demonstrates mild to moderate central canal narrowing due to generalised disc bulge and ligamentum flavum thickening. Exit foramina are clear.

L5/S1 demonstrates focal central disc protrusion causing mild central canal narrowing. Exit foramina are clear.

Conclusion:

There is mild central canal narrowing present at L3/4 and L4/5 with mild to moderate central canal narrowing noted at L4/5.
