Dear Dr Neil,

Thank you for seeing 79 year old Ling Ho for an ongoing cardiology review. She recently ceased her Entresto with good results on a cough, and has been monitoring her blood pressure. Of note is a recent MRIB undertaken during investigation of unilateral hearing loss which showed some microvascular ischaemic changes. I have asked her to bring this report to her follow up with you given your management of her anticoagulant and hypertension. Thank you for your ongoing care.

His/Her current medications are:

Product Name	Dosage	Frequency
Bisoprolol Oral Tablet 10 mg	1 tab	Daily
Rivaroxaban Oral Tablet 20 mg	1 tab daily	
Sacubitril-Valsartan Oral Tablet 24 mg-26 mg	1 tab	CEASED RECENTLY - for review

Yours faithfully,

Dr Jeremy Hall
