Comments:423103866

True UTI less likely in view of low leucocyte count. Patients without urinary symptoms should not be treated. Exceptions include pregnancy and before urological surgery. Suggest clinical correlation and repeat testing if clinically indicated.

This isolate produces an Extended Spectrum Beta-Lactamase (ESBL) which renders it resistant to a broader range of antibiotics. Potential treatment options are as reported. Patients who are in hospital may require additional Infection Control precautions. If advice regarding

this report is needed, please contact a Clinical Microbiologist through the main laboratory on 08 9371 4200.
