Dear Christopher,

**Re: Mr Joselito Dacion**  
**42 Rainwater Drive**  
**LYNDHURST 3975**

**Date of Birth: 16/7/1974 ; Phone no:0466 624 733.**

Thank you for seeing Mr Joselito Dacion, age 50yrs 6mths. with severe and ongoing symptoms from prednisolone following his first Pfizer COVID vaccination in 31/5/21. He was controlled on regular prednisolone and subsequently fractured a rib and hepatic steatosis and an attempt to change to azathioprine but had a profound interaction with allopurinol causing bone marrow suppression. He has recovered back to baseline with his ongoing pericarditis but still has ongoing severe limitations of exercise capacity.

**Past History:**

| Date            | Condition -- Comment                                                     |
|-----------------|--------------------------------------------------------------------------|
| 31 May 2021     | COVID-19 (coronavirus) immunisation<br>Pz Cominarty                      |
| 1 November 2021 | Pericarditis<br>secondary to mRNA vaccine (Cominarty)                    |
| 10 January 2022 | Pericarditis<br>Wolbinski- recurrent pericarditis. Rx with prednisolone. |
| 21 May 2022     | Hepatic Steatosis                                                        |
| 22 October 2024 | attempt to transition to Azathioprine<br>interaction with allopurinol    |

**Allergies:**

None recorded.

**Current Medications:**

| Drug Name                                                          | Strength                                     | Dosage                            | Reason | Last script |
