Dear Dr Downs

Re: **Mr Kym CHILTON - DOB: 07/09/1973**  
62 Meemar Street CHERMSIDE 4032

## **CT - HEAD**

### **Clinical Details:**

Persistent brain fog/poor concentration and mild headaches. No focal neurological defect.

### **Technique:**

Non-contrast scans performed.

### **Report:**

Mild asymmetry of lateral ventricles is variation of normal. The ventricles and extra-ventricular CSF spaces are within normal limits. There is no mass effect or midline shift. No extra-axial collection is seen. No focal lesion is seen.

No evidence of acute infarction or haemorrhage. The 3rd and 4th ventricles are midline and uneffaced. The craniocervical junction is normal.

The intra-orbital contents are normal. The sinuses are clear on the images provided.

### **Impression:**

**No acute intracranial abnormality is detected.**
