Particularly in younger women, a low AMH level does not exclude the possibility of fertility.</div> <div>Levels may be decreased in the latter part of the menstrual cycle and by the OC pill.</div> <div>High dose biotin (Vitamin B7) can interfere in the AMH Plus assay, causing a falsely low result. High dose biotin may be used in the treatment of Multiple Sclerosis, and is present in certain vitamin supplements, particularly those for hair and nails. If the patient is taking high dose biotin supplementation (>5 mg/day) this result may not be accurate, please repeat this test after at least 3 days off biotin</div>
