Clinical Notes Fatigue in 62 yo M with syncopal episode and muscle weakness  
for 12 months, muscle symptoms, vegetarian,. Fasting.

Collected 15/10/2024 07:18

Received 15/10/2024 07:20

#### C Reactive Protein

Test Name	Result	Units	Reference Interval	Comment
CRP	2.4	mg/L	<5	

#### Comments

CRP is a more sensitive early indicator of an acute phase response than is ESR. It also returns towards normal more rapidly with improvement or resolution of the disease process.

If CRP is elevated, it can indicate disease activity of an inflammatory, infective or neoplastic nature.

Artefactually decreased CRP values occur when patients are treated with antibiotics containing carboxypenicillins including Ticarcillin.
