Clinical Notes Fatigue in 62 yo M with syncopal episode and muscle weakness
for 12 months, muscle symptoms, vegetarian,. Fasting.

Collected 15/10/2024 07:18

Received 15/10/2024 07:20

Anti-Neutrophil Cytoplasmic Antibodies (ANCA)

Classical-ANCA (C-ANCA)	<40
Perinuclear-ANCA (P-ANCA)	<40

Comments

A negative ANCA does not exclude the presence of a large vessel (e.g. giant cell arteritis, temporal arteritis, Takayasu's arteritis) or medium vessel vasculitis (e.g. polyarteritis nodosa). Up to 5% of patients with Granulomatosis with polyangiitis (previously Wegener's) and other small vessel vasculitides (e.g. microscopic polyarteritis/polyangiitis) will also be ANCA negative. ANCA titres are expressed as a reciprocal of dilution from <40 (negative) to ≥ 2560 (strongly positive).
