**SEROLOGY**

**SPECIMEN: SERUM**

**SYPHILIS SEROLOGY**

Date: 16/12/24  
Coll. Time: 11:40  
Lab Number: 22113673

-----  
T.pallidum IgG Non reactive

22113673 No serological evidence of Treponemal Infection.

Treponema pallidum IgG is assayed on the Siemens Centaur/Atellica system.

TESTS COMPLETED: TRP, HIV,  
INCOMPLETE TESTS: CTU, HEP, HB1, HBT, HCV, MGU, NGU, TCH,

**SEROLOGY**

**HIV SEROLOGY**

**SPECIMEN: SERUM**

HIV Ag/Ab : Not Detected

A negative result does not exclude the possibility of exposure to, or infection with HIV.  
HIV antibody and/or p24 antigen may be undetectable in some stages of infection. In the presence of recent risk factors, further testing in 6 and 12 weeks is recommended.  
HIV Ag/Ab Combo is a 4th Generation assay which detects HIV p24 antigen and HIV type 1 (including Group O) and type 2 antibodies.  
Testing performed on the Siemens Advia Centaur System.

TESTS COMPLETED: TRP, HIV,

**MOLECULAR BIOLOGY**

**CHLAMYDIA TRACHOMATIS BY NAAT**

Collection Site	C.trachomatis
Urine	Not Detected

Please note change of assay to Hologic Panther since 3/10/22.

This assay is validated for endocervical, urethral, vaginal swabs (both high & low), penile swabs, genital swabs, anal & rectal swabs, oral & throat swabs, urines and liquid-based cytology solutions (PreservCyt Solution - Thinprep).

For all other specimen sites or sample types, please note that the assay has not been validated to the current NPAAC requirements because it is either an uncommon application or the rarity of detection precludes the laboratory from fulfilling all validation requirements. Therefore, it is not NATA/RCPA endorsed and the results should be evaluated in conjunction with the clinical presentation. For further information, please contact the laboratory.
