## HaematInics

Test Name	Result	Reference Interval	Units
Ferritin	130	30 - 250	ug/L
CRP	1.3	<5	mg/L
Active B12	> 128	>35	pmol/L
Folate (Serum)	24	>7.0	nmol/L

## Comments

Normal iron stores.

Note that in uraemic patients a functional iron deficiency may be present at ferritin levels up to 200 ug/L.

Active B12 (holotranscobalamin) is the biologically active fraction of total serum B12, and should be a superior indicator of B12 status. **Holotranscobalamin** level indicates Vitamin B12 deficiency unlikely. Up to 15% of patients will have a deficiency of carrier protein (haptocorrin) that does not appear to result in a clinically recognisable Vitamin B12 deficiency despite low total Vitamin B12 levels.
