## CT ABDOMEN & PELVIS

### CLINICAL NOTES

Intermittent epigastric pain.

### FINDINGS

No focal hepatic lesions. The portal and hepatic veins are patent. Gallbladder, biliary system, pancreas, both adrenals, spleen and both kidneys are within normal limits. Coeliac trunk, hepatic and splenic arteries, the SMA and renal arteries are patent. No para-aortic, iliac or pelvic adenopathy is noted. The bladder is unremarkable. No adnexal masses are noted.

Small and large bowel and the appendix are within normal limits. No free intraperitoneal fluid is seen. No mesenteric adenopathy.

Lung bases are unremarkable. No aggressive bony lesions have been identified.

### IMPRESSION

No acute abnormality has been demonstrated. No pancreatic ductal dilatation or obvious masses. No peripancreatic adenopathy.

Thank you for referring this patient.

Electronically Validated By  
**DR PATRICK EDWIN**
