

Mrs. Katrina Murison
Date of birth: 6/12/1988

Barcelona, 24.04.2025

Treatment summary

19.02.2024: First online meeting with Dr. Pilar Carrillo, who will follow the patient during the treatment. It was decided to opt for an egg donation of 8 mature eggs, which will be fertilized with Greg's sperm.

29.07.2024: First day of Katrina's cycle. She starts taking the contraceptive pill to synchronize her cycle with the donor's.

04.09.2024: Katrina discontinues the pill as per medical instructions, awaiting the arrival of her period.

08.09.2024: First day of menstruation. Katrina starts the endometrial preparation with Progynova 2mg (1 tablet every 8 hours).

20.09.2024: Ultrasound shows an endometrium of 6.2 mm. Katrina starts progesterone vaginally (Utrogestan 100mg, 2 capsules every 8 hours). On this day, the donor's egg retrieval takes place.

25.09.2024: Transfer of 1 embryo at day 5 of development. 5 additional blastocysts are frozen.

07.10.2024: Pregnancy test negative, medication discontinued.
After a few months, it is decided to repeat the transfer:

25.01.2025 - 21.02.2025: Katrina takes the contraceptive pill to coordinate the timing.

24.02.2025: First day of cycle, start of Progynova 2mg, 1 tablet every 8 hours.

05.03.2025: Ultrasound shows an endometrium of 10 mm, trilaminar.

18.03.2025: Transfer of 1 embryo at day 5 of development.

31.03.2025: Positive pregnancy test, continuation of medication until 24.05.2025 inclusive.
