

17/06/2024

Greg Murison
73 Balfour Street
Mornington
Wellington 6021

Dear Greg,

Our reference: 781988

DOB: 06/05/1985

NHI: VWD2933

Thank you for having a semen analysis at Fertility Associates. The following is the result of your semen analysis performed on 18/01/2024.

	Your Result		WHO Reference
Volume	4	mL	>1.5 mL
Sperm Concentration	33.5	million/mL	>15 m/mL
Total Motility	27	%	>40%
Progressive Motility (a+b)	11	%	>32%
Rapid (a)	0	%	
Slow (b)	11	%	
Non-Progressive (c)	16	%	
Total Progressive Motile Count (a+b)	14.74	million	

It is important to recognise that even in men without any fertility issues, sperm concentration and the proportion of sperm that are moving can fluctuate significantly week to week, and month to month, and can be lower than the WHO (World Health Organization) reference range.

We would also like to remind you that a semen analysis is only part of a fertility assessment. While it is your decision on how you use these results, Fertility Associates strongly recommends that you discuss the results with a fertility specialist or your GP. They can take into account your medical history to make recommendations about what to do next.

Fertility Associates is not a registered pathology laboratory - our expertise is fertility treatment. If you have any further question about your results, please contact your fertility specialist or GP.

Yours sincerely,

Anika Kelty
Clinical Embryologist
