

SHAE

Weight 2950 gms Length 49.5 cms

19 hours labour - 10 days overdue

Had Jaundice on 2nd day. Put under lights and fed every 3 hrs.

Clicky hip

Small hernia under navel.

Heart murmur

Blood A positive

Breast fed for 12 months, liked to sleep on breast, weaned 13 mths.

Eats a few solids 8 mths but not much

Crawled on bottom, walked 14 months

June 1986 (3) - Visited local doctor – pale – periods of tiredness.

Chest Xray – ok

Blood count - Anemia

Dr. Shnier – Liverpool - Went to Liverpool Hospital – count of 4.8 blood level

Given blood transfusion

Verdict - Transient Erythroblastaemia (a virus that effects the blood and made her anemic).

Dr. to monitor her condition weekly to see if the body overcomes the virus. Should last 6 – 8 weeks.

Sept. 1986 - Blood Count 12.7 – Dr. Shnier pleased

Blood counts to be done 6 weekly.

April 1988 – No blood test – Shnier pleased.

Did eco gram on heart – everything ok. Still has heart murmur.

May 2002 - Shae (19) hurt leg at kick boxing. Went to Dr. Pisarska after knee swelled, tried Celebrex didn't go down.

Referred to Dr. Sorrenti (away) Physio Andrew Hughes sent her to Dr. G. Burrows, who diagnosed torn cartilage. Need op. Had op at Castle Craig Private Hospital on 15th July. Not torn, scrapped tissue in knee and sent to Pathology. Came back query arthritis sent to Dr. Schreiber. Week later saw Dr. Burrows back in hospital blood clot in knee. Wash out, put in splint, not to bend – stayed 3 days. Saw Dr. Burrows 26th, 1st Aug. 7th Liverpool – leg stiff. Dr. Burrows wanted another op to bend knee. Asked for second opinion – Dr. Sorrenti does not want her to have op as possibility more bleeding. Could be worse off. Need to work on moving herself. Physio visits.

May '02

Hurt at kick boxing – swollen – left knee

Did Rhythmic gymnastics for many years as a child

Saw Dr had xray – went to specialist (Dr. Burrows)

He thought it was torn cartilage – put in hospital did arthroscope – not torn – scraped inside and did blood test – arthritic

Allergic to Naprosyn – made sick on stomach

A few days later – swelled and put back in hospital for another arthroscope as blood clot formed.

Put into brace and kept straight for a week

Afterwards had physio but couldn't get full movement back – stiff

2003 - right leg swells – saw Rheumatologist – put on Prednisone, Salazopyrin for short course.

Dr. said could try and take Methotrexate – decided not to.

Left knee clicks and not full movement

Right knee swells at different times
