Requested 26/06/2024

Clinical Notes Not Provided

Collected 12/07/2024 09:07

Received 12/07/2024 09:09

Chromosome Studies

Tissue Submitted	Blood	Received	12/07/2024
Clinical Indication	No clinical notes		
Number of Cells Analysed	5		
Number of Cells Counted	10		
Banding Studies	Giemsa		
Band Resolution	550 bands per haploid set (High)		
Karyotype	46,XY		
Interpretation	Male karyotype, no abnormality detected.		

Comments

The limit of resolution for conventional karyotype is approximately 10 Mb; structural rearrangements below this resolution or low level mosaic abnormalities may not be detected. Common benign polymorphic variation will not be reported. An apparently normal karyotype does not exclude the presence of other classes of genetic variants not detected by this assay. Results have been reported using ISCN 2020 nomenclature.
