**SARS-CoV-2 (CoVID-19) Serology**

SARS-CoV-2 antibodies (Total IgG/IgM) Detected

A reactive test result does not exclude past or present infection by other coronaviruses, such as SARS-CoV-1, MERS-CoV, HKU1, 229E, NL63, or OC43, or due to cross-reactivity from pre-existing antibodies or other possible causes. These results have been electronically notified to the relevant State Public Health Units. Testing has been performed using the Siemens SARS-CoV-2 assay which detects total antibody (IgG and IgM) against Spike (S) protein.

The Health Act requires that this disease be notified to the appropriate Health authority.
