Dear Courtney

Patient: Reiley PATERSON **DOB:** 08/06/1987
Address: 16/2 Andrew Street EAST FREMANTLE WA 6158
Phone: 0439929803

Please refer to my last letter addressed to you on 27 May 2022. I reviewed this gentleman in my rooms today. He examined well. His chest was clear. Heart showed normal double rhythm. Abdomen was soft. JVP was not raised. There was no leg oedema. Blood pressure was 120/80mmHg with a pulse rate of 70bpm. There was no significant postural change and no evidence of POTS.

I am happy to report that his cardiac MRI was completely normal showing no evidence of peri or myocarditis.

I explained to him that I do not have an explanation for his symptoms and I suggested referring him to a general physician, Dr Tony Ryan, because it seems like his symptoms are typical of chronic fatigue/an element of fibromyalgia. I did not make any plans to see him again.

Thank you and kindest regards.

Yours sincerely,

Electronically Approved
