Ferritin	19	L	30 - 300	ug/L

Comment See below

Decreased ferritin confirms iron deficiency. Iron deficiency in pre-menopausal women is usually due to pregnancy or menorrhagia. If these causes are excluded or in post-menopausal women, evaluation for gastro-intestinal sources of blood loss should be considered. For persistent iron deficiency, consider ongoing blood loss, dietary iron deficiency, malabsorption of iron and poor patient compliance with oral iron supplements.
