

Discharge Referral Notes**FINDINGS:**

Technically challenging study, intercostal only views of the right lobe of the liver and gallbladder acquired.

The visualised liver is of normal echogenicity and size. The main portal vein is of normal calibre and hepatopetal flow.

No biliary tract dilatation. The CBD measures 2 mm at the porta hepatis.

The gallbladder is normal in appearance. No cholelithiasis.

The kidneys are of normal size and echogenicity. No hydronephrosis.

The spleen and aorta are unremarkable.

CONCLUSION:

No liver or gallbladder abnormality identified. No cholelithiasis or biliary tract dilatation.
