## EXTRACTABLE NUCLEAR ANTIGENS

Extractable Nuclear Antigens: Negative

### Comments

The ENA (Phadia EliA) method screens for the following extractable nuclear antigens: SM, RNP, SS-A (RO), SS-B (LA), RO-52, SCL-70, JO-1 and CENPB. If testing for other ENA specificities is required, or if a high index of suspicion for an ANA-associated connective tissue disease remains please contact the laboratory as soon as possible so that other ENA testing can be added to this specimen if required. Please Note: specimens are only stored for 1 week following testing.

Specimen type: Serum

Immunopathologists: Drs G Unglik & J Bosco

MELBOURNE PATHOLOGY NATA NO.:2133
