ABOUT US

40 years in the making

Specialised care throughout your journey

Qualified practitioners Australia & worldwide

The FoodFit Compatibility System, is the result of over forty years of research and development by qualified Health Practitioners.

Our Naturopathic approach program is trusted and used in more than 20 countries by qualified Consultants.

The technique is based on the way in which the food and products benefit the individual person.

Each person is unique and with this applies the,

‘one size does not fit all’

philosophy when it comes to food and household products.

Each individual has his/her own nutritional and energy requirements.

Have you noticed that some foods give you good energy while others seem to drag you down and aggravate existing symptoms?

Compatibility Hair Analysis is about finding local food and household products that suit the individual.

It is not based on Nutritional advice nor is it a Medical program designed to treat diseases. This 6 month Program follows the principle,

“Feed the body correctly and allow the body to repair itself”

FoodFit

“Australia's food & Product Compatibility analysis experts”

GETTING STARTED

CONGRATULATIONS

Hannah

On starting your journey to a healthier, happier you!

In the next six months, we will combine effects to eliminate irritants from your body that may lead to discomfort and pain, while supplying it with essential components for improved well-being.

CLIENTS CHOOSE US!

STEP ONE

Complete the Meal Diary and return it to your Consultant. The filled-out diary will provide us with a comprehensive overview of the foods you are presently consuming.

STEP TWO

Your Consultant will provide guidance on eliminating the InCompatible foods and substituting them with the Compatible foods highlighted in black within this report.

STEP THREE

Your corrected Meal Diary will be your food list for the next 4 weeks. It is Ok to mix any foods in your corrected list. At week 4, consult your Consultant for further instructions.

ABOUT THE COMPATIBILITY PROGRAM

THIS IS NOT AN ALLERGY/INTOLERANCE TEST

Foods known to have caused anaphylaxis response, plus any known reactive foods.

SHOULD NOT BE REINTRODUCED

The focus of the Compatibility Programs delves deeply into the issue.

The purpose of this test is to correct the underlying problem that is causing your symptoms.

This is not an “allergy” or “intolerance test”. There are hundreds of components like fats, sugars and proteins that make up foods and it is impossible to accurately test for these individually as they appear in different combinations.

We test whole foods not individual components. Locating “allergic” foods and removing them usually relieves symptoms, but often does not get to the cause.

The situation is that some food/products cause the symptoms, while others aggravate the symptoms. These aggravations are what people usually pick up on. The pain is usually severe and immediate.

Currently, there is no known technology that can differentiate these reactions. This alternative test is exclusively administered by qualified Practitioners, monitoring your progress to ensure your best outcome.

FEEL THE DIFFERENCE

STEP 1

Assess each symptom's improvement percentage compared to the start of the program. Keep in mind that some symptoms may worsen initially. If so, don't be discouraged, take note and discuss with your Consultant.

STEP 2

Submit the completed form to your Consultant for review during your next appointment.

This tool enables you to track your progress on the Compatibility Program. Over time, it can be challenging to recall your initial symptoms. Completing this table provides a concrete way to track your recovery progress, keeping you motivated and highlighting how your body responds to the program. It allows you to determine more accurately if your symptoms are improving. It only requires a few minutes weekly, yielding impressive results.

**SIMPLY
FOLLOW
THIS
QUICK
TWO-STEP
PROCESS:**

RESULTS

The Consultant will evaluate your progress at various stages and support your journey.

The goal is to achieve significant relief from symptoms.

If progress is not satisfactory, the Consultant may explore other factors, or simply suggest allowing more time for your body to heal, potentially requiring you to complete another Progress Report.

It typically takes a minimum of six months for the body to repair itself, and in cases of severe tissue damage, the process may take even longer.

The frequency and number of follow-up consultations will be tailored to your specific requirements.

PROGRESS - RE-ASSESSMENT WHILE ON THE PROGRAM

Starting at a sub-clinical level means that it may take time for certain symptoms to fade away.

The approach is centered on how food and products can benefit each person individually.

Each person is unique and with this applies the, 'one size does not fit all' philosophy when it comes to food and household products.

While some individuals experience relief from symptoms within a few days, for others, it may take 6 to 8 weeks. The timeframe depends on how well you adhere to your Consultant's guidance and the extent of cellular repair needed.

Supplements, creams, and medications that are compatible may be recommended to alleviate symptoms until the immune system can address the underlying issue. Additional factors like parasites, viruses, and heavy metals can also affect the immune system and may require attention. Your consultant can provide further information.

QUESTIONS AND ANSWERS

HOW MUCH HAIR IS NEEDED?

Approximately ½ tsp cut from any part of the body. If no hair, use saliva on a cotton bud.
Place in a small plastic zip lock bag.

DOES IT MATTER IF MY HAIR IS COLOURED?

No, the equipment is calibrated to suit each hair sample.

HOW DOES THE EQUIPMENT WORK?

This equipment works on the electrical systems of the body. Every cell in the body requires electrical stimulation to function correctly. Incompatible foods and products can interfere with this electrical stimulation. All cells in creation have their own electro-magnetic signature. The electromagnetic field in the hair and the electromagnetic field of each food and product are brought together and either attract (COMPATIBLE) or repel (INCOMPATIBLE). The equipment is calibrated to a level which displays this on a computerized graph through a unique system of equipment and software.

HOW DOES THIS TEST DIFFER FROM THE SKIN PRICK AND BLOOD TESTS?

Those tests relate to allergy type symptoms. Underlying allergy or allergic symptoms there is usually a compromised immune system. (Poor cellular function)

Compatibility testing is designed at a level where we test for foods and household products that compromise cellular function. Poor cellular function leads to inflammation which is involved in most dis-ease states. The Compatibility test is testing at a much deeper level.

IS THIS AN ALLERGY TEST?

No, this is a compatibility test which tests for food and products that are either incompatible or compatible with each individual.

WHAT PROBLEMS MAY I ENCOUNTER WHEN I START THE PROGRAM?

On rare occasions it is possible to experience symptoms of elimination such as bad breath, coated tongue, excess mucus, gunk in the eyes etc. This depends on the level of toxicity associated with the condition.

Skin conditions may get temporarily worse, because skin is a large eliminatory organ.

Always talk to your Consultant if any of these symptoms happen.

HOW LONG BEFORE I SEE RESULTS?

Usually symptom relief can occur in 3-10 days as the inflammation settles.

By the end of 4 weeks the body is in repair process stage.

Results may vary on the severity of symptoms.

WHY DO I NEED TO ELIMINATE THE FOOD IN RED FOR 6 MONTHS?

Excess inflammatory mediators in the bloodstream can cause inflammation. Some inflammatory mediators live up to 120 days. To cover all scenarios and gain the maximum benefit for the client it is recommended a minimum of 6 months. Our experience has shown up to 75% improvement in symptoms at the 4-week stage is quite common. However, there can be some tissue damage which requires the body to need more time to repair. This is why we recommend a minimum of 6 months on the programme and then retest. Some items will take longer depending on compliance, others may never correct depending on the amount of tissue damage.

WHY CAN I ONLY EAT THE FOODS REMAINING IN BLACK ON THE LIST?

Every food or product that is not on the list is assumed as being incompatible to the body unless individually tested. This applies to other brands as well.

Eating as little as one incompatible item three times a week can slow down or stop the repair process.

QUESTIONS AND ANSWERS

HOW DO I REINTRODUCE THE FOODS THAT HAVE BEEN ELIMINATED?

There is a very strict procedure for reintroducing corrected items to help lower the risk of rebound. Reintroduction must be guided by your practitioner. We recommend retesting between 6 and 9 months. Full retest instructions are included in the Retest Report.

AFTER 6 MONTHS THE RETEST STILL HAS SOME OF THE SAME FOODS PLUS A FEW EXTRAS ONES. WHY IS THIS?

The original sample is tested on symptomatic level (the red zone) which rates between 60-80 on our scale. Under 60 the item is incompatible. During the 6 months it is very possible for the items at borderline level to present in the red zone. If previous foods in red are now in black it is recommended to slowly reintroduce this food to avoid a rebound of this item.

IS IT NECESSARY TO GET A RETEST?

If you reintroduce a food that has not corrected, symptoms may return and often be much worse. There is a likelihood that this could undo all what has been gained on the program. Retesting is recommended between 6 and 9 months. We find that around 75% of incompatible items will correct at this point. Some will remain and may take up later on. There may be a few new ones. The new ones are added to your first list for another 4 weeks. After the 4 weeks we have a very strict protocol for reintroducing corrected items.

MY RETEST HAS LITTLE IMPROVEMENT, WHY IS THIS?

Firstly, improvement is very dependent on the instructions being followed very strictly for the full 6 months. Secondly it could mean the body just needs more time. At this stage other influences such as viruses, parasites, and heavy metals may present and need to be dealt with. The major plus of this program, is it allows the body to heal in the order it wants to heal. For example, the main symptom may be headaches and minor symptoms, bloating, constipation and muscle aches. While on this programme the body will determine which ailment improves first, therefore the headache may be the first to go or the last symptom to go. When we treat ourselves symptomatically like taking a Panadol for the headache, we will get temporally relief only because the underlying cause has not been addressed.

IS IT NORMAL FOR MY SYMPTOMS TO GET WORSE?

It is possible to experience elimination symptoms such as bad breath, coated tongue, excess mucus loose bowels etc. This depends on the toxicity level associated with your condition. Skin conditions may get temporarily worse, skin being a large eliminatory organ.

WHY CAN I EAT POTATOES BUT NOT POTATO FLOUR OR CORN BUT NOT CORN FLAKES?

Processing and cooking changes the structure of the food. Synergism also plays a major part.

This means that a food or food component may test incompatible on its own but when cooked or mixed in with other ingredients that process can change the original reactivity.

Whole foods are tested; this means foods are tested as you eat them. E.g. 28 different species of tomatoes raw and cooked are tested under the item tomato.

WHY CAN I EAT COMMERCIAL CAGED EGGS BUT NOT ORGANIC EGGS?

The eggs composition will reflect what the hens are eating.

CAN I EAT ORGANIC MEAT IF MEAT COMES UP IN RED?

No, organic meat is included in the meat test.

WHY AM I FEELING UNWELL WHEN I EAT CHOCOLATE YET IT IS IN BLACK ON MY LIST?

It is possible the body is not digesting it well at this stage or elevating sugar levels. Mostly this situation corrects by the end of the program.

WILL THIS HELP ME TO LOSE WEIGHT?

Some people do experience weight loss on this program. The program assists the body to detox/eliminate better.

QUESTIONS AND ANSWERS

CAN I GET MY BABY TESTED?

Yes, the youngest baby we have tested was 2 days old. We do have specific protocols for conception, pregnancy and babies. Refer to your Consultant.

CAN I HAVE EXTRA ITEMS TESTED?

Yes. Ask your Consultant. A new hair sample will also be needed.

MY PET SUFFERS A SKIN CONDITION CAN I HAVE IT TESTED?

Yes. We have a pet test list as well. Ask your Consultant for details.

MY WIFE IS FROM ANOTHER COUNTRY AND COOKS DIFFERENT FOOD TO WHAT IS ON YOUR STANDARD LIST. DO YOU HAVE OTHER FOOD LISTS?

Yes, we have other lists including: United Kingdom, America, Dubai, Singapore/India, New Zealand. Other countries can be arranged. For your pets we have an Animal test.

I SUFFER FROM HAYFEVER TO DUST AND POLLUTANTS. HOW DOES ELIMINATING FOOD IN MY DIET HELP THIS CONDITION?

Eating incompatible food can cause inflammation of mucus membranes including the membranes in the throat and nose. When inhaling dust, fuel, perfumes etc these irritate the already swollen sensitive mucus membrane which may lead to Hayfever/sinus symptoms. When the incompatible foods are removed, it reduces the swelling therefore making the external environment more tolerant.

WHAT IS IRRITABLE BOWEL SYNDROME AND HOW WILL THIS TEST HELP ME?

IBS is an area of inflammation in the bowel. This program is focused on finding which food and products are causing inflammation leading to IBS.

I'VE TRIED A LOT OF DIFFERENT THINGS TO GET RID OF MY SKIN RASH AND NOTHING HAS HELPED SO FAR. HOW WILL THIS TEST HELP SKIN CONDITIONS?

Inflammation is common to most skin conditions. Skin conditions can be caused/aggravated by constipation. By improving elimination, we are assisting the skin to repair. This program is focused on finding which food and products are causing the inflammation.

I HAVE ELIMINATED DAIRY, PROCESSED FOODS, WHEAT AND SUGAR PRODUCTS IN THE PAST AND STILL FELT UNWELL. HOW WILL THIS TEST HELP ME?

Often wheat, sugar and dairy aggravate symptoms. Eating incompatible foods works collectively and we need to eliminate all to be effective. Eating one incompatible food three times a week is enough to cause inflammation and stop the repair process.

CAN YOU TEST MAKEUP AND SKINCARE PRODUCTS?

Yes. If you are not progressing well enough at the 4 week stage your Consultant can determine if further testing is necessary.

SHOULD I TAKE SUPPLEMENTS WHILE I AM ON THIS PROGRAM?

Your Consultant will advise on which supplements you need.

I AM FEELING BETTER CAN I COME OFF MY MEDICATIONS?

Seek advice from your prescribing practitioner before stopping or reducing supplements and medications.

WHAT IF I AM EATING OTHER FOODS NOT ON YOUR LIST?

Every food or product that is not on the list is assumed as being incompatible to the body unless individually tested. Eating as little as one incompatible item three times a week can slow down or stop the repair process.

COMPATIBILITY RETEST VOUCHER

For optimal results from your Compatibility Program, it is crucial to undergo a retest between six and nine months after initiating the program. This allows your Consultant to assess your body's response to the program and determine if any additional adjustments or therapies are needed.

Typically, around 75% of foods and household products show improvement within six months, but some may require more time. Reintroducing items too soon or in large quantities can lead to a resurgence of symptoms. Your retest report not only identifies which items can be reintroduced but also provides guidance on how and when to do so.

Maximise the benefits of the program by contacting your Consultant to schedule your retest before the specified date. If you wait beyond nine months for the retest, changes in your body may necessitate starting the program anew.

Contact your FoodFit Consultant for Reduced Retest Fee.
