Summary of Care

Summary of Care

Letter of Introduction

Dear Dr Sara Bialczyk,

Thank you for reviewing Karley Brodie a 23 year old female to be discharged on 05/02/2024 from the Emergency Dept SDMH at Shoalhaven District Memorial Hospital.

The summary of their presentation and condition is documented below.

Visit Information

Date of Presentation: 5/2/24

Presenting Complaint: 23F 1/52 lower abdo pain, bloating and nausea

BG endometriosis

Impression: Likely endometriosis flare

- treated with ketorolac IM 20mg in ED
- DC on regular panadol and ibuprofen with safety netting to return in 48 hours if no improvement

Discharge Plan:

1. DC home
2. Please make a follow up GP appointment in the upcoming week in order to monitor symptoms and progress. GP to please:
 - provide scripts for ongoing medications as needed
3. Medication changes - please review ongoing need in community:
 - regular panadol and ibuprofen
 - pantoprazole 40mg daily for 7 days while on regular nurofen
 - ondansetron 4mg PO up to max three times daily
4. If any new or worsening symptoms, please present to the emergency department for review

HPC

Experiencing lower abdo pain for last week

Described as "sharp"/"popping", constant 6-18/10 severity, non-radiating

No clear triggers

Sees Dr Tatham for endometriosis management

- currently on trial of amitriptyline, takes 10mg daily

- seeing pelvic PT

Mirena inserted Sep 2023 with curette under GA by Dr Tatham, plan for lap ?botox in future

Denies dysuria

Denies fevers

BLO 4 days ago, states normal for her during an endometriosis flare, not taking any aperients

Been taking panadeine forte at home, 1-2 tabs daily with minimal relief

Last PV bleed Jan 2024, since mirena insertion light bleeding every 3 months

Prior to Mirena states daily painful bleeding

Past Medical Hx
