##### *Narrative & Impression*

==== ORIGINAL REPORT ====

PROCEDURE(S): GR FEMUR LEFT

HISTORY: post op assessment.

COMPARISON: 11 July, 2025 left hip radiograph.

##### INTERPRETATION:

Interval fixation of the left hip with a long intramedullary rod, proximal lag screw and distal locking screw. No evidence of hardware complication.

Ill-defined permeative sclerosis of the left proximal femur is again visualized. No evidence of fracture.

Moderate left hip degenerative change.

Soft tissue swelling and postsurgical subcutaneous emphysema overlying the left hip.

##### IMPRESSION

Expected appearance following ORIF of the left femur.
