## Serum Haematinics

Test Name	Result	Reference Interval	Units
Vitamin B12	317	> 177	pmol/L
Active B12	123	> 35	pmol/L

High dose biotin (>5mg/day) taken prior to blood collection may interfere with these tests.  
If indicated, please phone our General Pathologist on 42247474 for any advice.

## Notes

Ferritin: N.B Ferritin range change 28/04/17

High dose Biotin (5mg/day) may interfere with these tests.

## Comments

In line with Medical Benefits Schedule changes, people with low or equivocal vitamin B12 results (<376 pmol/L) will be routinely tested for holotranscobalamin (active B12) to clarify their B12 status. Both tests are now Medicare rebateable. Those with vitamin B12 concentrations >375 pmol/L are generally replete.

Both active Vitamin B12 (Holo-transcobalamin) and total Vitamin B12 indicate that the patient has normal Vitamin B12 status.
