

OPERATION RECORD

Procedure: Laparoscopy +/- Exc of Endometriosis + Ovarian PRP + Hysteroscopy + CD138

Date: 30/07/2025

Mrs Shae M AITKEN

Surgeon: Dr Kee J Ong

5/10-12 Alexandra Parade

Assistant: Dr Maree KEKEFF

COTTON TREE 4558

Anaesthetist: Dr Anthony MCDOUGALL

GP: Dr Jonathan Last

Hospital: Broadwater Day Surgery

URNO: DOB: 24/06/1983

FINDINGS

Shae had a laparoscopy and division of significant adhesion.

She has extensive adhesions of the omentum to the sigmoid colon to the left lateral abdominal wall, left fallopian tube, and the left ovary and finally the left pelvic sidewall.

I have managed to remove all the adhesions, but the adhesions on the left ovary is too risky.

I have taken some photos of that. Hopefully, we will still be able to access the ovary during her egg collection.

I performed ovarian PRP. I have injected 1.5 mL of PRP into each ovary.

Her uterine cavity appears normal and I performed CD138 testing.

TECHNIQUE

POST-OP ORDERS

I will be seeing her in a week's time. I will manage her accordingly.
