Thyroid Antibodies

Test Name	Result	Reference Interval	Units
● Thyroid Peroxidase Ab	146.2 H	<5.6	IU/mL
● Thyroglobulin Ab	101.5 H	<4.1	IU/mL

Comments

Thyroid Antibodies: Levels up to 100 IU/mL can occur in normal subjects (5% of males, 15% of females - mainly elderly) and may also occur in non-thyroid autoimmune and chromosomal disorders.

Raised levels may occur in prodromal hypothyroidism before TSH elevations occur and may also be seen in thyrotoxicosis, thyroiditis, non-toxic goitre and thyroid cancer. The levels seen in Graves' Disease and Hashimoto's can vary from normal up to > 1000, but are usually elevated.
