Doctor's Overview

Hi Viktoria

It is really great you are keen to know more about your health. As you haven't provided any details of symptoms or reasons for testing, I'm afraid I can only comment in general terms for you.

You have high levels of vitamin B6, if you are taking an oral supplement then I recommend decreasing your dose.

I hope you have found this information helpful.

Best wishes

Donna Payne
MBBS, BSc, MRCGP, DOccMed
