Patient Details

Patient Name: GUO, YUANFEI

NHI No:

Date of Birth: 18-Apr-1990

25-OH Vitamin D: 86 nmol/L (50-150)

Comment: Indications for measuring 25-OH vitamin D include symptoms or signs suggestive of rickets, osteomalacia, or other bone disorders and proximal myopathy. Asymptomatic patients at risk for vitamin D deficiency or insufficiency can be safely supplemented with no need for follow-up testing (see 2016 BPAC guidelines, also for guidance for dosage).

Ordered by: PAID REQUESTS

Laboratory:

Observation date: 18-Oct-2025
