Addressee: Dr MOMIA TEARIKI-TAUTEA Referred by: Dr MOMIA TEARIKI-TAUTEA  
Name of Test: Genital Culture  
Requested: 31/07/2025 Collected: 31/07/2025 Reported: 03/08/2025 11:56

Clinical Notes: sti contact screening//  
Pathologist: Dr P. James

#### Genital Culture

Site: Low Vaginal Swab

Gram Stain: Few white blood cells  
Moderate Gram variable pleomorphic bacilli  
Moderate Gram positive cocci  
Few Gram positive lactobacilli  
Few epithelial cells

Culture: Heavy growth of mixed genital flora

Microscopy findings are consistent with bacterial vaginosis.

Treatment is only indicated for symptomatic bacterial vaginosis (note that 50% of patients experience post-treatment recurrence within 3-12 months). Recommended treatment options are:

- metronidazole 400 mg, orally, 12-hourly with food for 7 days, or
- metronidazole 0.75% gel 5 g, intravaginally nocte for 5 days (not on PBS), or
- clindamycin 2% vaginal cream 5 g, intravaginally nocte for 7 days (not on PBS).

For alternative treatment options please consult Clinical Microbiologist.
