

**Patient Name:** MALONEY, ROBYN  
**Patient ID:** 009599-ROMH  
**Gender:** Female  
**Date of Birth:** August 3, 1962  
**Contact Phone:** 0746226856  
**Referring Physician:** RAPATSA, ALWYN

**Accession Number:** 2025102-CR  
**Study Date:** September 8, 2021 09:49  
**Report Status:** Final  
**Study Description:** XR L KNEE / TIB FIB  
**Modality:** CR  
**Reporting Radiologist:** CHU, CHRIS  
**Typist:** JS5

## **Findings**

### **X-RAY LEFT TIBIA, FIBULA AND KNEE**

**Clinical History:** Knee pain.

#### **Findings:**

The bones appear slightly osteopaenic. Tricompartmental margin osteophytes are noted. Mild joint space narrowing in the medial compartment is noted. Tibia and fibula are intact. No discrete fracture is seen. No destructive bone lesion is demonstrated. No abnormal periosteal reaction is demonstrated.

Radiologist: Dr C. Chu
