

19.7.29 WISE Metal sculpture.

2 dancers that are frozen

The frame - a strong part

An upside down gymnast - handstand
supported by the other person

What I want to do is go through the foot -
really inviting; a little thing like a green ribbon
through the foot, into the leg & other body,
bright & gold

pops out the heart space & goes back down the
person's other leg & into the light

Strong form - v rigid

The other thing light is to

light & foot & can zoom through the hole in
the legs

Feels safe as the structure strong & still & grounded
are

a channel

Can zoom through & pop out the hole

Lots of movement inside that structure
tunnels in the side; playful

A spanner - that's open & clamp things in; pliers
smooth bits for twisting wire

One for gripping

One for cutting wire

Organic shape about them

Crustaceans - crabs hippos

HG

(2Hujia) It squeezed & - soft enough to break
like crab shell - hard but brittle; crunchy; delicate
but give the impression of strength.

Strength but so many holes in it that it may not
be that strong

an hour glass - time; time is ticking away through the hole
Fragile when you see the direction of it

Supported side has a very secure footing but not much
time left

Disintegrating; holes getting bigger & not much time left.

The structure reminds me of Hayden.

Physically his body's become less & more holes you can
see straight through. Some of them quite insightful.
Yesterday he admitted that we had difficulties to friends
we were Dx w/ PNB - he shared his exp. w/ neighbor

Husband born 5/11/2 - who needs the support - the
mother or baby

1st baby - difficulty gaining wt $\rightarrow$ stressing it
Family wanting to help - allow them to help.

EXP.

1. Feel quite vulnerable

V. few places to go - without having a hole

A lot of windows

want to be in the (solid) part; is physical pressure
to feel contained

Bumps on outside - like crabs - armor; some kind of
protection

Holes - like something chewed it from the outside & made
the hole - external factor.

Hearts going fast

Feel it in my face - where I feel my stress - face feels
sore as if smiling too much.

I feel a bit worked up; hot.

Chest - being in that compressed dark spot. I can
see the light in windows over there.

Fear

Being in that little egg

Coming out of that space, can put feet on edging of tunnel; a net; an onion bag net; solid but can walk across holes in light coming through.

Feeling disorienting as can feel the air

Fun; curious; where does the tunnel go?

↓

move released.

1. Curled up on chair; hard to breathe; confined
Restricted; not safe; trying to hide; to be invisible
in this little tunnel
2. Freeing; space; air; relaxing; normal breathing
lighter.

Seeing Hayden in that shape, gave me

I see him so declining - lost wt.
