

Practical test:

- **Screen 1**
 - **NOTE:**
 - Design a screen as shown below. The layout should fit in all iOS devices' **without scroll**.
 - For your reference, we have attached images for the different device and icons used in Screen 1 in "**Screen1 with Resources.zip**". The same layout showing different devices.
 - On the Arrow icon under the 4th Option ("Reveal") given in the above screens you have to navigate to **Screen 2**
- **Screen 2:**
 - You will have to create UI where in you have to display a button to upload image to the server
 - There will be another button to get profile of the login user. You have to display uploaded image.
 - On clicking on uploaded image you have to navigate to **Screen 3**
 - Sequence of API calls:
 - **Login api ::**
 - API URL:
 - <http://spaculus.live/projects/2/playground/backend/auth/login>
 - **Params :**
 - email: t1@gmail.com,
 - password: 123456
 - **bearer token : no**
 - **Update Profile api ::**
 - API URL:
 - http://spaculus.live/projects/2/playground/backend/user/Update_profile
 - **Params :**
 - full_name: "",
 - username: "",
 - phone:"",
 - profile_image:
 - **bearer token : yes**
 - **Get Profile api ::**
 - http://spaculus.live/projects/2/playground/backend/user/get_profile

- No params
- bearer token : yes
- Screen 3
 - Implement screen as shown in "**Screen 3 Booking Screen Image.zip**".
 - As shown in the above attached screen you have to display collapsable/expandable list of bookings with date.
 - On clicking of any date the selected date section should be expanded and list of bookings for the selected date should be displayed.
 - Please find the below sample data to display in the booking list
 - **Note:** Don't give importance to build ui. Make sure the functionality as explained above for the Screen 3
